

How does Ayrton contribute to Sustainable Development?

These are the first steps on our journey to improve our ecological credentials, in all areas of our business. We will publish regular reports and updates on our progress and share our learnings as well as our success.

100% Renewable

Since June 2022, Ekvolt supplies Ayrton with green electricity. This is the first step in Ayrton's objective of achieving 100% renewable energy use by the end of 2022.

Reducing Impact

128,408
fewer single use plastic/foam items entering the environment since 2019

4,320 tCO₂
less emissions due to inbound rail freight

First end-to-end **Carbon Emissions Audit**
led by independent consultant Avieco in Feb 2022

Reusing **Robust Plastic Pallets**
for shipping & for storage

Engaging

Using **Local Suppliers**
for our corporate events

FSC/PEFC
certified corrugated boxes & recycled paper

No Single-use Plastic
bottled water and soft drinks at our offices

Providing high quality **Reusable Drinking Flasks**
to our colleagues, partners and users

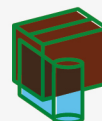

Separating waste for **Recycling**
into Plastic, Glass, Paper & General Waste

100% Green Power
for our new showroom by the end of 2022

Using **Biodegradable pallet wrap**
and pellets at Ayrton from June 2022. Factory to follow suit in the near future

Action

Creating **Guide of Recycling End-of-Life Products**
for our partners and users by Q2 2023
